

# Single Sign-On (SSO) Guide for Users

VisualDx is now available through Single Sign-On (SSO) through your institution.

SSO access allows users to sign-in to their organization's SSO portal/electronic health record username and password, and VisualDx will recognize those credentials with no additional effort and allow access.

## Step 1

Log into your organization's SSO portal or electronic health record.

A screenshot of a login form with two input fields: 'EMAIL ADDRESS' and 'PASSWORD'. Below the fields is a red 'Sign In' button. The form is set against a light blue background.

## Step 2

Navigate to VisualDx through your **Resources** page or by opening a web browser and visiting **visualdx.com/visualdx**. You should be brought into the product without the need for a username or password.

VisualDx users earn CME\* credit for each clinical inquiry made using the resource.

\*For more information on CME activity, visit: [visualdx.com/earn-cme](https://visualdx.com/earn-cme)

## Set Up Your **Personal Account**

Bring VisualDx with you anywhere and everywhere.

- 1 Receive an email that your account has been automatically created and set your password for the mobile app.
- 2 Download the **VisualDx** mobile app from the Apple Store or Google Play Store.
- 3 On your device, locate the **VisualDx** app and login with your username and the password you created in Step #1. Congratulations, you're ready to go!

Note: Your email address should appear in the upper right corner.
